

COOPTECH KFT. INTEGRATED POLICY

Cooptech Kft. Integrated Policy

Cooptech Kft. is a company specializing in construction technology installation and general contracting, focusing on the design, manufacturing, implementation, repair, installation and automation of pressure systems, storage tanks, steel structures, industrial pipelines and building engineering systems.

The management's fundamental philosophy is to provide complex, high-quality services, create value and ensure efficient and competitive operations while continuously increasing customer satisfaction. This approach is based on an integrated management system that encompasses all activities.

To achieve this, Cooptech Ltd. is committed to establishing, implementing, maintaining and continuously improving an integrated management system in line with the MSZ EN ISO 9001:2015, MSZ EN ISO 14001:2015, MSZ EN ISO 45001:2018 and MSZ ISO/IEC 27001:2023 standards as well as meeting current societal expectations. The company also emphasizes the communication of changes and the provision of the necessary human and technical resources.

Therefore, the top management of Cooptech Ltd. has defined the following integrated policy points:

- We monitor, comply with and enforce compliance with relevant laws, regulations, standards and other obligations undertaken.
- We are committed to setting MIR, KIR, MEBIR and IBIR objectives annually, communicating them to our employees, encouraging consultation with employees and ensuring communication channels are available to achieve these objectives and continuously improve the integrated management system.
- We regularly assess the fulfilment of our goals and commitments in a management review at least once a year.
- In our activities we are committed to fulfilling the requirements of MIR, KIR, MEBIR and IBIR and we consider the needs and expectations of other stakeholders, including society beyond just fulfilling customer and other requirements.
- We continuously seek techniques in our production and service processes that allow us to prevent workplace accidents, injuries and health impairments and to provide a safe and healthy work environment.
- We are committed to sustainability, preventing environmental pollution and supporting environmental protection. We continuously monitor the amount of waste generated, examine reduction and recycling opportunities and prefer suppliers using environmentally friendly or recyclable materials.
- We commit to fulfilling the requirements related to information security and are dedicated to continuously improving the company's information security system.
- Based on the experiences of past events, we consider prevention and correction as top priorities.
- We support the individual development of our employees and subcontractors through regular training and further education as well as raising awareness of the importance of quality, environmental and health protection workplace safety and social responsibility.
